

AREA DI INTERVENTO

This architectural drawing shows a multi-story building facade. The upper left portion of the facade is highlighted with a red rectangular border. This highlighted area contains a grid of small, square windows. Below this grid, there are two larger, rectangular windows. The rest of the facade features a variety of window sizes and arrangements, including some with horizontal louvers or shutters. The drawing is a black and white line art representation.

This is a detailed architectural floor plan of a building. The plan shows a complex arrangement of rooms, corridors, and service areas. A prominent feature is a large rectangular area on the left side, outlined in red, which appears to be a large open space or a specific functional zone. The building has multiple wings and a central corridor system. Various rooms are labeled with numbers and letters, and there are numerous windows and doors indicated by lines and symbols. The overall layout suggests a multi-story building with a high degree of organization and functionality.

The figure consists of two diagrams illustrating the design of a circular building. The top diagram is a cross-section showing a central core with a spiral staircase, surrounded by a circular structure with a flat roof. The bottom diagram is a plan view showing the same central core and surrounding circular structure, with a spiral staircase in the center.
